
Contents

| | pp. |
|--|-----|
| <i>Troshchenko V.M.</i> The probleme of alkaline metasomatites formation in terms of tectonic and physchal-chemical aspects | 5 |
| <i>Konovalenko N.O., Butyrin V.K., Paranko I.S.</i> The features of east contact structure of Kryvyi Rih basin metavolcanogenesedimentary rocks strata with enclosing granitoides | 13 |
| <i>Alekhin V.I.</i> Features of fault zones manifestation in Priazovskiy block of the Ukrainian Shield in mesocenozoic sedimentary rocks strata and soils | 20 |
| <i>Kovalchuk L.M., Evtekhov V.D., Evtekhov E.V., Puchkov I.P., Dudar L.T.</i> Variations of mineral content of magnetic processing products at mining and ore-dressing complex of Kryvorizhstal combine | 28 |
| <i>Sazonova Yu.V.</i> Geological structure and its influence on mining and exploitation exploration of iron quartzites deposits | 35 |
| <i>Velikanov Yu.F., Velicanova O.Yu., Gorlitskiy B.O., Zankevich B.O., Koval V.B.</i> Granitoids of the Krivbass framing. 1. Geological-structural position of the East-Hannivka strand granitoids | 48 |
| <i>Khoudour Dj.</i> Main tectonic elements of Kryvyi Rih structure and their role in formation of high grade iron ores | 58 |
| <i>Kharytonov V.M., Oliynyk T.A., Myroshnichenko Yu.M.</i> Mineralogical recommendations to the development of processing technology of apatite-ilmenite ores of one of the deposits in the Cherkasy province of Ukraine | 67 |
| <i>Fedorishyn Yu.I.</i> Brief analisis of ancient platforms basement ultrametamorphic formations composition in connection with their diamond-content | 75 |
| <i>Plotnykov O.V., Koval V.B., Petrusenko I.Yu.</i> Structural-tectonic factors of iron ore deposits of Ukrainian Shield industrial value | 84 |
| <u>Short communications</u> | |
| <i>Yushin O.O.</i> Prospects for the complex platinoid-chromite mi- | 91 |

| | |
|---|-----|
| neralization in ultramafite complexes (on the example of Kapitanivske deposit, Middle Pobugya) | |
| <i>Evtekhov E.V., Evtekhov V.D.</i> Relationships of associated useful minerals bodies localization of Kryvyi Rih basin and other regions of the Ukrainian Shield iron ore deposits. 1. The influence of metamorphic factor | 95 |
| <i>Fedorova I.A., Stetsenko V.V., Evtekhov V.D.</i> Granulometric composition of Novorayske deposit clays (Donetskyi basin) | 101 |
| <i>Falkovich O.L.</i> Geochemical features of gold mineralization (on the example of Klyntsi deposit) | 105 |
| <i>Filenko V.V., Tyryshkina S.M., Ivanchenko V.V., Evtekhov V.D., Nesterenko T.P., Kovalchuk L.M.</i> Composition and dressability of metallurgical slimes of Kryvorizhstal combine | 109 |
| <i>Tyryshkina C.M., Ivanchenko V.V., Kotlyar M.I., Kovalchuk L.M.</i> Mineralogical grounding of rising of steel-smelter slag utilization efficiency..... | 113 |
| <i>Zighmi K.</i> Evaluation of potential gold-content in the Tuareg Shield Pre-Cambrian complexes | 117 |
| <i>Gubina V.G., Kadoshnikov V.M.</i> Red slime of the Mykolayiv alumina plant as a valuable technogenic raw material | 122 |
| | |
| <u>Discussions, bibliography</u> | |
| <i>Evtekhova H.V.</i> Geological researches of Kryvyi Rih iron ore rock mass alpine formations | 127 |
| | |
| <u>Chronicle</u> | |
| Bilokrys Leonid Sergiyovych | 137 |
| Petrun Viktor Fedorovych | 142 |
| | |
| <u>Short information about authors</u> | 145 |
